

Scale Interceptor

Scale Interceptor™

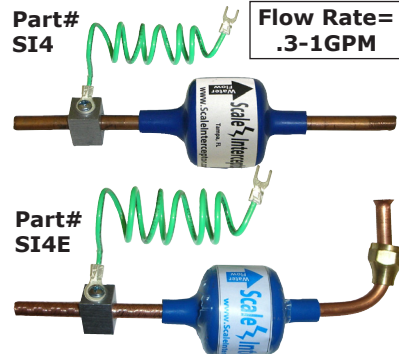

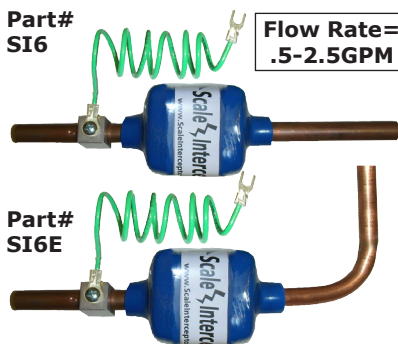

Save Money! • Easy To Install!

No Wires! No Power! No Batteries!

No More Scale!

(1/4")	(3/8")
SI4	SI6

assembled

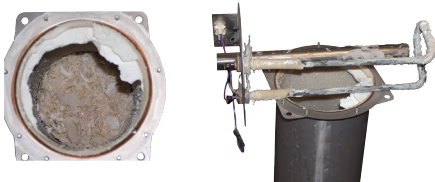

Benefits

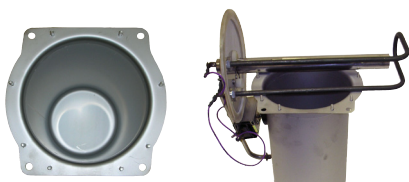

- Substantially reduces (about 80%) service calls on equipment in hard water areas
- Enhances customer satisfaction
- Provides longer utility life of equipment
- Increases account retention
- Reduces electric usage costs
- Eliminates the need for other lime reducing filters
- Provides chemical free method of controlling lime scale build-up in most water processing applications
- Produces no pressure loss
- Performs on water to 50 grains hardness
- Most powerful ionic induction field known in the industry
- No chemical replenishment costs

- Performs well up to 300°F
- Performs in acid and alkaline waters
- Eliminates the hazardous job of acid cleaning coils, etc.
- Eliminates the need for time consuming, costly lime scale inhibitor chemicals
- No storage area required for chemicals
- Reduce MSDS reporting and compliance forms
- No environmental hazards
- Provides a uniformity of scale control without any labor or equipment failures
- Compared to chemical treatment, the one time charge of the Scale Interceptor always provides the greater benefit

Without Scale Interceptor

With Scale Interceptor

Testimonials

"It performed beyond our expectations!"
"It's the best thing we ever did!"
"It costs less than one service call!"
 - Randy Sanborn (Ryder Coffee)

"Of my 27 years in this business I was skeptical that it was 'just another magnet powered product.' The testing of the Scale Interceptor has proven it to be a remarkable device. Give it a try or give me a call."

- Butch Winkler (Holiday House)

What Does the Scale Interceptor Do?

The Scale Interceptor prevents the development of scale on commercial water and beverage equipment. The Scale Interceptor should be installed on a clean machine so that the breakdown of existing deposits doesn't harm or cause problems to the machine.

How Does it Work?

The Scale Interceptor is a permanently energized ionic inducer composed of rare earth metals. This reduces the adhesive bond between dissolved (calcium and magnesium) minerals in your water as it passes through your equipment. The one time installation provides maintenance-free, scale-free equipment.

Eliminate scale build up and service calls on:

- Coffee Brewers
- Evaporative Coolers
- Ice Machines
- Most Water Lines
- Steamers

The Four ABSOLUTE MUSTS!

1. MUST use clean, filtered water
2. MUST be sized properly (flow rate)
3. MUST be grounded to ground connector supplied
4. MUST use proper flow direction
